### **E3 Displays Announces Expansion of its LCD Product Line**

Product line now includes comprehensive LCD display solutions, including; mechanical/electronics integration, sunlight readability, ruggedization, front surface treatments, LCD module repair and LED backlighting.

**Phoenix, Arizona, November 10, 2008**

E3 Displays (E3D) announces expansion of its product offerings to include full LCD enhanced products and services. Display enhancements include the complete re-design of backlight optics systems, integrating electronics and mechanical assemblies and improving the front screen performance using anti-reflective, anti-glare/EMI filter glass or incorporating touch panel technology. These additional products and services are well suited for the avionics, military, marine and industrial sectors of the LCD display industry.

Built on a foundation of engineering, technology and product innovation, E3D has the resources to develop full LCD enhancement packages for clients calling for a comprehensive LCD solution. E3D president Chuck Rahrig states, "While E3 Displays is proud to be known as the premier bonder in the LCD industry, we are much more than that. Many customers require that we provide integrated solutions and take more of the 'box' off their hands. Our employees, suppliers and corporate leadership are fully committed to delivering such comprehensive LCD solutions to our customers."

### **About E3 Displays**

E3D is a display engineering and manufacturing company which works with OEM/ODM customers in the avionics, marine, military, industrial and medical electronics industries to define, design and produce customized flat panel display systems and components.
